

## Pesarana Kohandazh High School

To Whom It May Concern,

It is a pleasure to recommend with confidence Mr. Mohammad Yaqoob Rasooly for bachelor's program at your respected university. I used to teach his Mathematics and Physics during high school. I found his highly intelligent, energetic, and also very committed student who inspired so many other students with his volunteer work and outstanding contribution to the course program.

I was his Geography and History teacher for two years. During that period, he demonstrated exceptional academic ability and had a keen interest in science subjects, particularly mathematics. His advanced skills and devotion to science subjects make him an ideal fit for your bachelor's degree.

More than any other activity, Mohammad Omer had an impressive curiosity about both theoretical and practical knowledge. He had an interest in understanding how things work. He was interested in knowing how these formulae meet all their outcomes in real life. Several times, I discovered in him such a visionary. He always used to raise his hand when I was looking for someone who could take part in the class lessons and solve some mathematical equations and was the only student who met with much-deserved applause at the end of the class.

His superiority and intelligence can easily be understood through the academic marks he has recorded in his high school transcripts. After graduating from school, he successfully got accepted into the Computer Science faculty of Kabul University, the most competitive university in Afghanistan with flying colors. Despite all these obstacles, He is still very confident and very committed to his dreams and his future goals. I always encouraged him for keeping such rigorous attention, intelligence, and confidence. Overall, his willingness to risk his marks to expand his knowledge base was inspirational even to me.

In all endeavors, he demonstrates intelligence, poise, and judgment beyond his youth and experience. His character and tenacity will be an asset to your program. And that is why I firmly recommend him without hesitation, as he is an outstanding young boy in every sense of the word. You will enjoy having him as a student.

Sincerely

Abdul Qayom Ismailkheel  
Geography and History Lecturer
